Technical Skills

Javascript | Java | Python3 | React | Redux | jQuery | HTML | CSS | MUI | Node.js | Express | postgreSQL | APIs

Work Experience

Prime Digital Academy - Minneapolis, MN (remote)   **June 2020 - October 2020**
Full Stack Engineering Student

- Solo Project - Adventure Hub
  - Adventure Hub is a web application where users can create a bucket list of adventures they want to go on. They can also view their friend's feed and search for national parks. This solved the problem of having unorganized lists in phones.
  - Technologies used: Javascript, React, Redux, MUI, Node.js, Express, postgreSQL.
- Group Project - Weekly Wager
  - Pro bono project with a local start-up company in Minneapolis. The project was to create a mobile-first web application where users can make wagers with friends based on professional sports games.
  - Technologies used: Javascript, React, Redux, MUI, Node.js, Express, postgreSQL, and multiple 3rd party APIs.

HID Global - Eden Prairie, MN   **April 2019 - May 2020**
IT Services | RTLS Systems   (laid off due to covid)

- Traveled to various customer locations, including out of state, to certify device installation.
- Collaborated with Software Engineers, who assisted in debugging issues I found on the field.
- Certified real time location services (RTLS) devices, including testing devices, debugging issues, and managing configurations within the company website.
- Helped train a team of certification testers to certify 15,000 devices.
- Manually updated firmware on 5,000+ devices using company software.

DJO Global - New Brighton, MN   **April 2018 - October 2018**
Inside Medical Sales Rep   (laid off due to outsource)

- Promoted to inside sales / insurance reimbursement.
- Sold orthopedic DME devices.
- Communicated with customers about their insurance benefits before closing sales.
- Created training documents for the records department.

Insurance Verification Specialist   May 2017 - March 2018

- Managed patient records.

Education

Prime Digital Academy   **2020**
